

Figure 4. Sequence relationships for the Snf2 family. Cladogram showing the relationship of the Snf2 family to other helicase-like proteins of superfamily 2 (SF2) (Fairman-Williams et al. 2010). Subfamily relationships within the Snf2 family are indicated based on alignments of the helicase-like region from 1306 members (Flaus et al. 2006). Branch lengths are not to scale. Swi2/Snf2 is the founding member of the Snf2 family of remodelers. (Adapted from Flaus et al. 2006, by permission of Oxford University Press.)
